INTELLI COUNT FAST COUNTING SYSTEM

Intelli Count is a smart system that provides counting operations to you most effectively with eligible costs, without straining yourself, without hindering sales and without closing your business. Intelli Count which can work integrated to your own system with only RFID printer, mobile handheld terminal and RFID chips is a system that does not require much cost and long setup times. RFID chips are coded and printed with RFID printers and RFID tags are compatible with existing barcode system. In fact, it is free from extra barcode printing costs. After printing operations you can attach your label directly onto your product without further processing. RFID tags have the same appearance with barcode system tags.

Properties of The System

- 1-Easy to use
- 2-Cost-Effective
- 3-Parametric Structure
- 4-Serial Reading
- 5-Integration with Barcode Systems

Advantages of The System

You can perform the count without having to take your weekends, without interrupting your work or without the need to shut down your shop. You can reach a clear and accurate information about how many of your products is missing while you continue counting thanks to RFID system that do no absolutely double counting.

**INTELLI
COUNT FAST
COUNTING SYSTEM**

Number of products at your fingertips in a **single device** and a **single click!**

**Dynamic,
Efficiency,
Maximum Reliable,
Minimum Undeterminity**
